Overview

Lignorim wooden pushrims are handcrafted in a family workshop in Austria, using ash wood.

The ash, a European tree

A wood made for effort

The ash is a European tree whose wood has traditionally been used to make objects subject to high stress: pickaxe handles, baseball bats, gymnastics wall bars…

Light and strong

This wood is therefore particularly well suited to making wheelchair pushrims. Lignorim wooden pushrims are both light enough and strong enough to be used every day, in all conditions, even in the wet.

Elegance and comfort

These pushrims are elegant and add a touch of refinement to your wheelchair. Very pleasant to the touch, they are smooth and do not give the cold feeling of metal pushrims.

The 5 Models

Lignorim pushrims come in 5 different models, available for rear wheels with a diameter of 24 inches or 25 inches.

MODEL 1

Thin profile

Profile: **Ø 20 mm**

The pushrim profile is a circle with a diameter of 20 mm. This is the diameter of a “classic” metal pushrim.

per pair of pushrims · Apollo WW price

MODEL 2

Medium profile

Profile: **20 × 24 mm**

The pushrim profile measures 20 × 24 mm. This model offers a larger contact surface with the user’s hand.

€455 incl. VAT

per pair of pushrims · Apollo WW price

MODEL 3

Wide profile

Profile: **20 × 30 mm**

The pushrim profile measures 20 × 30 mm. This even larger surface reduces the effort required and increases power and propulsion efficiency. This shape also provides better control when braking.

MODEL 4

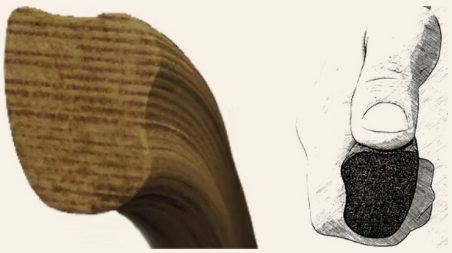

Ergonomic profile

Profile: **25 × 30 mm**

The profile has a shape designed to optimize grip, notably with a groove to position the thumb. The profile measures 25 × 30 mm.

€485 incl. VAT

per pair of pushrims · Apollo WW price

MODEL 5

Ergonomic profile with rubber strip

Profile: **25 × 30 mm**

The profile has the same shape as the ergonomic model, but a rubber strip is added in an additional groove. This model is particularly suitable for people with reduced hand strength.

Colors

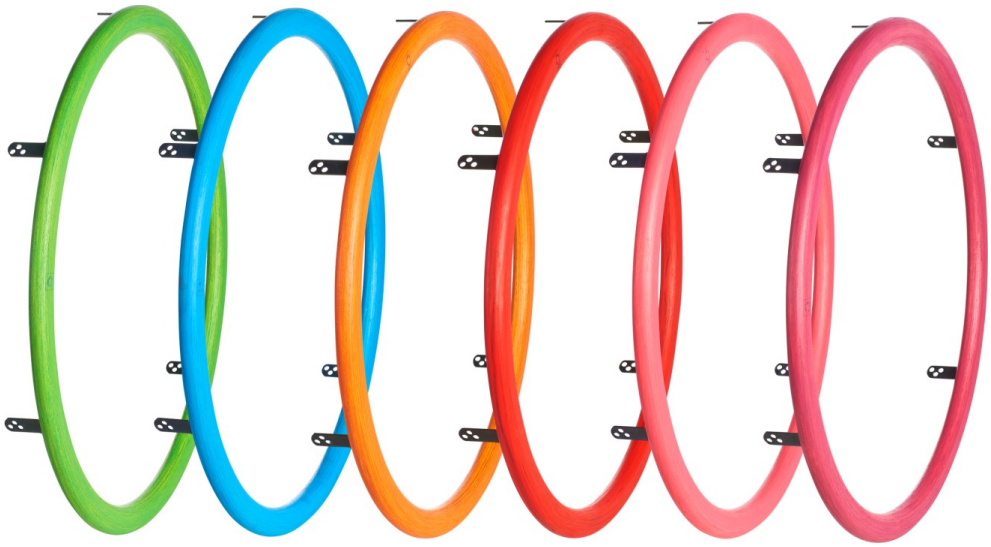

Apollo Wooden Wheelchairs offers Lignorim pushrims in 9 different colors:

3 wood tones

● Light wood ● Brown wood ● Dark wood

6 colors

● Green ● Blue ● Orange ● Red ● Pale pink ● Pink

Additional Information

Mounting

All the pushrims have 6 aluminum mounting tabs, each drilled with 3 holes, allowing the pushrim to be attached to the wheelchair wheel with a choice of 3 possible distances between the pushrim and the wheel.

Mounting must be done with M5 screws (5 mm diameter), possibly completed with suitable nuts, depending on the wheel model.

These fasteners are not supplied with the pair of Lignorim pushrims.

Maintenance

Any scratches on the wood can easily be removed by sanding with fine sandpaper (grit size above 200), allowing the pushrims to last for many years.

Delivery

Home delivery in France within 4 to 5 weeks at a flat rate of €40 incl. VAT.
